3D Modeling with Rhino — Advanced

In this advanced 3-day class you will learn to take advantage of Rhino's advanced features. You will also learn tips and tricks for faster and simpler creation of high quality models. This class is recommended for users who either have completed the intermediate Rhino training or who are experienced and familiar with most of Rhino functions.

Course Outline

Page

PART I: Getting Started 5

1 Introduction 1

PART II: Interface Customization 7

2 Customizing Rhino 9
The toolbar layout 9
Rules for commands in buttons 15
Command aliases 18
Macro editor 19
Shortcut keys..... 20
Plug-ins 21
Scripting 24
Template files 25

PART III: Advanced Modeling Techniques 31

3 NURBS topology 33

4 Curve creation and continuity 37
Curve degree..... 37
Curve and surface continuity 39
Curve continuity and curvature graph 40
Advanced techniques for controlling continuity 49

5 Surface continuity 51
Analyzing surface continuity 51
Matching surface continuity 51
Add knots to control surface matching 55
Surfacing commands that pay attention to continuity 58
Surface blend options 69
Fillets, blends and corners 70

6 Modeling with history..... 79
Activating history 80
Why is history off by default? 80
Steps in the History chain 80
History enabled commands 82
History-related commands 82

7 Advanced surfacing techniques 85
Dome-shaped buttons 85
Creased surfaces 91
Curve fairing to control surface quality 97

8 Use background bitmaps 103

9 An approach to modeling 111
10 Applying 2-D graphics 121
Make a model from a 2-D drawing 126

11 Surface analysis 131

12 Sculpting 137
Tools to help in control point editing 137
Gumball 137
DragMode 137
Nudge 138
SetPt 138
InsertKnot 138
InsertControlPoint..... 138

13 Deformation tools 145
Deforming objects 145

14 Blocks 151
Instances and definitions 151
Defining blocks 151
Insertion points 151
Embedded and linked blocks 151
Layers and blocks 151
Editing blocks 152

15 Troubleshooting 155
General strategy 155
Start with a clean file 155
Guidelines for Repairing Files 155

16 Polygon meshes 159
Render meshes 159
Meshes for manufacturing 159
Meshes from NURBS objects 160

PART IV: Rendering 165

17 Rendering 167
Rendering properties 169
Scene lighting 171
Image and bump maps , decals..... 173

Professional Engineers Ontario

Authorized by the Association of Professional Engineers of Ontario to offer professional engineering services.
