3D Modeling with Rhino — Intermediate

This course addresses the needs of users who are experienced in 3D modeling but not very familiar with Rhino, or the ones who have completed Rhino basic course and want to improve their modeling skills. This fast-paced class covers the review of the basic course plus more advanced topics.

Course Outline

Page

PART THREE 3-D Modeling and Editing 141

7 Creating Deformable Shapes 143
The Rubber Ducky 143
Create the body and head shapes 143
Separate the bill from the head 148
Create the duck's neck 149
Render a picture of the ducky 153

8 Modeling with Solids 155
Model a bar with engraved text 156
Offset solid text 159

9 Creating surfaces 162
Simple surfaces - Phone 162
Planes 163
Surface from planar curves 164
Surface from edge curves 164
Extruding curves 165
Join 168
Lofted surfaces - Canoe 171
Revolved surfaces – Vase 176
Rail Revolve – Heart, star..... 176
Sweeps andcurve networks 178
Rear-view mirror 179
Toy hammer 183
Squeeze bottle 190

10 Importing and exporting 196
Exporting Rhino File Information 196
Importing other file formats into Rhino 196

11 Rendering 199
Apply materials 199
Add lights 204
Add textures 206
Use a groundplane 212

12 Annotating your model 215
Dimensions 215
Dimension types 215
Dimension tools 215
Linear Dimensions 217
Leaders 217
Making a 2-D drawing from a 3-D model 219

13 Printing and Layouts 221
Printing 221

Layouts 221

PART FOUR Extras 231

14 Transforming solids 233
Flow along surface 233
Surface direction 234
History and Gumball 234
Flow 238

Professional Engineers Ontario

Authorized by the Association of Professional Engineers of Ontario to offer professional engineering services.
